EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Business Systems

July 2024 - Present

Radiant International School

AISSCE - Non-Medical Sciences

May 2022 - April 2024

EXPERIENCE

Freelance Web Developer (Self-Employed) — 2025 – Present | Remote

- Architected and shipped full-stack client projects end-to-end, handling development and deployment independently.
- Delivered streamlined booking and payment solutions leveraging Razorpay and SMTP email automation.
- Engineered AI-powered SaaS tools and API-driven platforms for real clients with zero supervision.
- Coordinated client communication, project timelines, and delivery across multiple simultaneous projects.

PROJECTS

RNR Esports | Next.js, TypeScript, Supabase, Razorpay, PostgreSQL - 2026

<https://www.rnresports.in/>

- * Built a fully self-service booking and payment system reflected in real-time on both user and admin dashboards.
- * Implemented Razorpay payment gateway and SMTP server for event-triggered email confirmations.
- * Administered the full PostgreSQL database for bookings, users, and payment records.

Ghost Recover | React, TypeScript, Supabase, PostgreSQL, Vite - 2025

<https://ghostrecover.netlify.app/>

- * Created a full-stack SaaS app that helps businesses algorithmically detect and re-engage ghosted leads using AI-generated follow-up messages.
- * Developed real-time lead management dashboard, scheduled ghosting-scan jobs, and an analytics module to track recovery rates.
- * Programmed a scalable serverless backend using Supabase Edge Functions and constructed a full admin panel for monitoring user activity.

Boomer's Gaming | Next.js, TypeScript, CSS, WhatsApp API, Zomato District API - 2026

<https://boomer-s-gaming.vercel.app/>

- * Crafted a premium, visually rich website with advanced UI/UX components and smooth animations.
- * Incorporated third-party APIs including WhatsApp and Zomato District for enhanced user engagement.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, SQL, R

Frameworks: React, Flask, Next.js

Developer Tools: Git, Docker, Visual Studio Code, Vercel, Supabase, PostgreSQL, Vite

Other: REST APIs, **SMTP**, **Razorpay**, UI/UX Design, Client Communication, Lead Generation
